ABSTRACT

This document is a statistical report on Catholic elementary and secondary schools in the United States. The first part of this report presents data concerning an overview of the historical dimensions of Catholic education and the context of American education in which private schools operate. The second part includes Catholic school enrollment and staffing demographic data that highlight school, student, and staffing characteristics, and special services provided to students in Catholic schools. The report is based on census data gathered by each of the 176 arch/diocesan offices of education in the United States and the U.S. Virgin Islands. Although there was a diocesan response rate of 100 percent, the data do not include responses to all the items by all the dioceses or by all the schools within each diocese. Appendices give summary statistical reports on number of schools and enrollment (sorted by region; sorted by region, state, and diocese); archdiocese/dioceses ranked by number of students; states ranked by number of students; number of full-time-equivalent staff, sorted by region; number of schools per location, sorted by region; and government funded programs, sorted by region, state, and diocese. Preface

The National Catholic Educational Association has been providing leadership and service to Catholic education since 1904. NCEA's mission is to advance the educational and catechetical mission of the church and provide leadership and service to its members.

NCEA is the largest private professional association in the world, representing more than 200,000 educators serving over 7.6 million students in preschools, elementary and secondary schools, parish catechetical and religious education programs, diocesan offices, colleges, universities and seminaries.

Since 1970, the National Catholic Educational Association has published a statistical report on Catholic elementary and secondary schools in the United States. These annual reports are designed to provide an understanding of this significant sector of American education, to inform the public discussion of educational policy issues and to encourage and improve practice at the school level.

The first part of this report presents data concerning an overview of the historical dimensions of Catholic education and the context of American education in which private schools operate. This is followed by Catholic school enrollment and staffing demographic data that highlight school, student and staffing characteristics and special services provided to students in Catholic schools.

The report is based upon census data gathered by each of the 176 arch/diocesan offices of education in the United States and the U.S. Virgin Islands. While there is a diocesan response rate of 100%, the data do not include responses to all of the items by all of the dioceses or by all the schools within each diocese. I wish to thank the diocesan superintendents of schools and their staffs for their assistance in collecting and collating the data from their schools.

I am grateful to the members of the NCEA Data Bank Committee for their suggestions and editorial assistance: Mr. Michael Guerra, Executive Director, Department of Secondary Schools; Ms. Regina Haney, Executive Director, National Association of Boards of Education; Dr. Robert Kealey, Executive Director, Department of Elementary Schools; Mr. Daniel Curtin, Executive Director, CACE Department and Ms. Barbara Keebler, Director of Communications.

I would also like to acknowledge the invaluable assistance of Mr. Wade Marshall, Director of NCEA Member and Information Services, for his expertise in developing the reports. I am also grateful for the assistance of Mr. Matthew Weitz for the data entry and for preparing the manuscript for publication, Ms. Beatriz Ruiz for production design and Ms. Phyllis Kokus, Publications Manager, for directing the publication process.

Dale McDonald, PBVM, Ph.D.
Director of Public Policy and Educational Research

Executive Summary

Over-all enrollment figures for the school year 2000-2001 indicate a slight decrease (less than one half of one percent) from that of the previous academic year. These national enrollment data reflect a mixed picture: the elementary school population experienced a decline that is less than one half of a percent, while the secondary school enrollment rose slightly more than one half of a percent. The enrollment decline is concentrated in the Mideast (1.2 percent) and Great Lakes (1.4 percent) regions of the country. Increases occurred in the Southeast (0.8 percent) and Far West (1.7 percent). These data reflect demographic changes within American society in general and the Catholic population in particular.

The enrollment decreases have been centered in the large urban areas of the Mideast and Great Lakes, areas that were populated by high concentrations of Catholic immigrants in the late 19th and 20th Centuries. Large numbers of Catholic schools were built in these areas to serve the children of immigrants. Initially, these schools were sustained through the generosity of parishioners, but the succeeding generations of Catholics moved out of the neighborhoods into the suburbs. Parishes, with financial support from the dioceses and other donors, made heroic efforts to keep the schools open to serve newly arriving immigrants, even though the parish populations declined and many of the newer students were not Catholic. However, in the last decade it has become increasingly more difficult for dioceses to continue to provide the substantial financial assistance required to keep the schools open with modest tuition and reasonable compensation for teachers. While private philanthropy has enabled many poorer families to meet some of the ever-rising tuition costs, it has not been enough to sustain the viability of these schools. However, where diocesan and privately funded scholarship support is available in inner-city schools, long waiting lists for lottery-like selection processes have resulted.

The good news is that there is a growing demand and enthusiasm for Catholic schools in the suburban areas of the Southeast and Far West. In those regions, 54 new schools opened last year and more are projected to open in the coming years. Waiting lists now exist in more than 44% of the schools, primarily in suburban areas.

Highlights

Enrollment:

- Total Catholic school student enrollment for the current academic year is 2,647,301.
  2,004,037 elementary/middle school; 643,264 secondary school
- Minority student enrollment is 680,042 which is 25.6% of the total enrollment.
- Non-Catholic enrollment is 358,349 which is 13.6% of the total enrollment.

Schools:

- There are 8,146 Catholic schools: 6,920 elementary; 1,226 secondary.
- 54 new schools opened; 61 closed or consolidated.
- 3,586 schools (44.0%) have a waiting list for admission.
- Coeducational schools comprise 99.1% of elementary and 64.1% of secondary schools. At the secondary level, 14.8% of single gender schools are male and 21.1% are female.

Professional Staff:

- Full-time equivalent professional staff numbered 161,496:
  laity 93.5%: (lay women: 74.6%; lay men: 18.4%)
  religious/clergy 6.5%: (sisters: 5.1%; brothers: <1%; clergy: <1%)
- The student/teacher ratio is 16:1.

Catholic School Education in Historical Perspective

The existence of Catholic schools in the United States can be traced back to French and Spanish settlements that continued into the colonial era of this nation's history. The increased immigration of Catholic populations in the 19th century produced an expansion of Catholic schooling.

In the 1830's, the public, "common" school movement was begun to serve distinct national social and political goals: a common body of knowledge was to be transmitted in a common schoolhouse in order to decrease political and social conflict and shape the culture of the new nation. However, by the 1840s, public education and the inculcation of religious values were bound together in a concept of non-denominational Christianity.

Catholics began to resist attempts to teach "common Christianity" and were embroiled in conflicts charged with religious, ethnic and class animosities over control of the schools. Ultimately, the Second Baltimore Council directly attacked the Protestantism of the common school and the Catholic bishops committed the Church to the establishment of a separate school system and required parents to send their children.

While the goal of erecting a school within every parish, mandated by the Third Plenary Council of Baltimore, (1884) was never realized, the growth of Catholic education was steady and extraordinary. Before the Civil War, there were approximately 200 Catholic schools in the United States, and that number increased to more than 1,300 within a decade and to 5,000 by the turn of the century.

In this century, constitutional battles were fought over compulsory public education and the liberty to choose alternatives. The Supreme Court legitimized a dual system of education (*Pierce v. Society of Sisters, 1925; Yoder v. Wisconsin, 1972)* with decisions that protected the right of the non-public school to exist and the freedom of parents to choose from among alternatives for their children. As these alternative systems began to reflect upon their service to the common good and examined the fiscal costs in providing such public service, they began to challenge the inequities inherent in denial of funding because of educational choices exercised by parents. This debate continues today as part of the national conversation about educational reform and the rights of parents to determine the best educational setting for their children.

20th Century Enrollment and Staffing Patterns

Schools and Enrollment History

Exhibit 1 reports the steady growth of Catholic schools from 1920 to the mid-1960s. By 1965, the peak year, there were almost 13,500 schools enrolling 5.6 million students. The next two decades saw a significant diminishment in the both the numbers of schools and their enrollment. During the last decade, however, the rate of school closures has declined and enrollment has been steadily rising.

2001	**2,004,037**	**643,264**	**2,647,301**

School Staffing History

During the last quarter of the 20th century, dramatic changes have taken place in the staffing of Catholic schools. The staffing patterns listed by decades in Exhibit 2 indicate the depth of the change. The data show the shift from an almost entirely religious staff (sisters, brothers, priests) of 90.1% at mid-century (1950) to 48.4% in the 1970s to an almost complete inverse where laity constitute 93% of the staff at the end of the same century. In general, the changes have been attributed to the decline in the number of women and men entering religious orders, the large numbers of religious who left their orders and the change of ministry directions for many congregations from schools to other forms of social and pastoral ministries.

Public/Private School Comparisons

Private schools, defined as those controlled by a non-governmental entity and financed from sources other than public taxation, have been an important component of American education since colonial days. The existence of private schools reflects the fundamental right of parents to exercise freedom of choice in selecting the education they deem most appropriate for their children. Parents select private schools based on several factors, among which are the religious, educational, cultural and social values that are espoused by the institution.

The National Center for Educational Statistics (NCES) survey of the private schools during the 1997-1998 school year indicates that were 27,402 private elementary and secondary schools in the United States. Private schools account for 24.4% of all American schools. Private schools enroll approximately 5 million students, representing 10% of total elementary and secondary student enrollment in the United States.

Private schools are categorized as Catholic, other religious and non-sectarian. Catholic schools are classified as a) parochial, b) diocesan, c) private. The category other religious schools is comprised of three typologies: a) schools identified as conservative Christian, b) schools affiliated with a specific religious national denomination, c) schools not aligned with a national denomination. Non-sectarian schools are a) regular, b) special emphasis, c) special education.

Schools which are classified as other religious constitute 48.2% of private schools, Catholic schools represent 29.9% and non-sectarian 22%. In contrast to the number of schools, there is a higher percentage of students in Catholic schools which enroll 49.5% of private school students while other religious schools enroll 34.8% and nonsectarian 15.7%.

The Private School Universe

Some interesting changes have taken place within private education during the last 35 years. In 1965, Catholic education comprised approximately 68% of the schools and 87% of the enrollment in private education. At the start of the 21st century, religious schools of other denominations have grown rapidly and now comprise 48.2% of the private schools. They tend to be much smaller in size than Catholic schools, thus enrolling only 34.8 % of the students in nonpublic schools; Catholic schools enroll 49.5% of the private school population.

Catholic School Demographics: 2000-2001 Academic Year

School Characteristics

Number of Schools:

Elementary/Middle	Secondary	Total
6,920	1,226	8,146

Regional Distribution

Data are presented in regional groupings. For this purpose, the National Catholic Educational Association groups the schools and dioceses/archdioceses into the following six geographical regions:

New England	Great Lakes	Southeast	West/Far West
Connecticut	Illinois	Alabama	Alaska
Maine	Indiana	Arkansas	Arizona
Massachusetts	Michigan	Florida	California
New Hampshire	Ohio	Georgia	Colorado
Rhode Island	Wisconsin	Kentucky	Hawaii
Vermont		Louisiana	Idaho
		Mississippi	Montana
Mideast	**Plains**	North Carolina	Nevada
Delaware	Iowa	South Carolina	New Mexico
District of Columbia	Kansas	Tennessee	Oklahoma
Maryland	Minnesota	Virginia	Oregon
New Jersey	Missouri	U.S. Virgin Islands	Texas
New York	Nebraska	West Virginia	Utah
Pennsylvania	North Dakota		Washington
	South Dakota		Wyoming

Regional Distribution

Exhibit 7 presents the number of schools within each of the regions with the percentages of the distribution indicated by level of the schools and the national composite. Slightly more than half of all the schools (51.7%) are located within the Mideast and Great Lakes regions. However, the national trends in population increases in the Southeast and West over the last decade are reflected in the increasing percentages of schools located in those areas.

Location of Schools

Although there has been a decrease in the total number of Catholic schools in the past 35 years, the church has not lost sight of its commitment to educate children, particularly those of the poor, within the inner cities and urban areas. Schools in these areas remain a significant presence: 45.5% of all Catholic schools are located in urban and inner city areas, despite population losses and great financial difficulties in maintaining them. During that same period of time, suburban and rural schools have steadily increased.

EXHIBIT 8
LOCATION OF SCHOOLS: 2000-2001

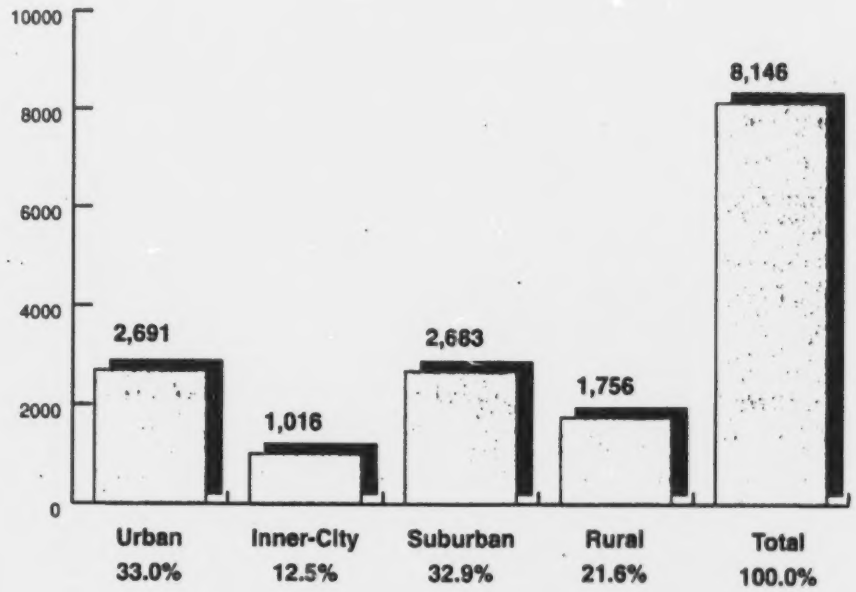
Total	6,920	100.0	1,226	100.0

NATIONAL TOTALS



Types of Schools

Catholic school typologies are determined by the source of their sponsorship. There are four classifications of Catholic schools:

Parish: sponsored by a single parish church community
Inter-parish: sponsored by two or more parishes
Diocesan: sponsored by the arch/diocese
Private: sponsored by a religious order or a private corporation

Exhibit 9 indicates that most elementary schools are parish sponsored; however, in the last decade, the growth in the number and percentage of elementary inter-parish schools has risen from 8.9% in 1990 to 12.2% in 2001, reflecting the reorganization and consolidation of schools within dioceses. At the secondary level, sponsorship has remained fairly constant: private (42.3%) and diocesan (35.7).

Enrollment by Region

The total enrollment data, charted by region in Exhibit 14, indicate that although the Mideast and Great Lakes regions declined slightly over the past decade, they continue to enroll more than half the school-age population: 52.6%. The Southeast and West/Far West regions have continued to experience increases in that same time period.

States with Highest School Enrollments

As detailed in Exhibit 15, ten states accounted for nearly two-thirds of Catholic school enrollment. New York, California, Pennsylvania, Illinois and Ohio — the top five — had 44.6% of total enrollment. The position changes in this list reflect increased enrollment in the Southeast and the decline in enrollment in Wisconsin that placed it below a tenth place position.

EXHIBIT 15

STUDENT ENROLLMENT: STATES WITH TEN HIGHEST ENROLLMENTS

Percent	67.2	65.3	64.2

* Includes Wisconsin enrollment of 80,256 students.

Dioceses with the Twenty Largest Enrollments

The twenty largest dioceses serve over 46.1% of the total enrollment in Catholic elementary, middle and secondary schools, as illustrated in Exhibit 16. Many dioceses are larger than the metropolitan area of their title. Most of the enrollment in these 20 dioceses comes from the major city and the immediate suburbs of that area. Again, the decreasing percentage and the position changes in this list reflect increased enrollment in areas that did not have a large Catholic population in earlier decades.

EXHIBIT 16
STUDENT ENROLLMENT: DIOCESES WITH THE TWENTY LARGEST ENROLLMENTS

Southeast	574	16.0
West/Far West	910	25.4
Total	**3,586**	**100.0**

Tuition and Costs

Tuition fees paid by families constitute a portion of the actual per pupil expenses. The average per pupil tuition in elementary schools is $1,787 which is approximately 63% of actual costs per pupil. About 81% of elementary schools provide some form of tuition assistance.

The secondary median freshman tuition is $4,300 which is approximately 75% of actual costs. About 97% of secondary schools provide some form of tuition assistance.

The difference between the per pupil cost and the tuition charged is obtained in many ways, primarily through direct subsidy from parish, diocesan or religious congregations resources and from multi-faceted development programs and fund-raising activities.

EXHIBIT 19
AVERAGE TUITION AND PER PUPIL COSTS

Elementary
Median parish school tuition: $1,787 Per pupil cost: $2,823

Secondary
Median freshman tuition: $4,300 Per pupil cost: $5,700

Based on the average public school per pupil cost of $6,512, Catholic schools provide more than $17.2 billion dollars a year savings for the nation.

Report Card on American Education: A state-by-state analysis. American Legislative Exchange Council, 1999.

Student Characteristics

Student Ethnicity

The percentage of minorities in Catholic schools has more than doubled in the past 30 years. In 1970, minorities accounted for 10.8% of the Catholic school population, in 1980 it had increased to 19.4% and in 2001 it is at 25.6%. In the same time period, the percentage of African American enrollment increased from 6.5% to 8.0%. The percentage of Asian Americans increased from 0.5% to 3.9%. The Hispanic enrollment rose from 5.2% to 10.9%.

Enrollment of Non-Catholics

Most Catholic school students are Catholic. However, non-Catholic student enrollment has risen from 2.7% in 1970 to 11.2% a decade later and today is 13.6% as shown in Exhibit 21.

Staffing of Catholic Schools

In 2000-2001, the total, full-time equivalent (FTE) teaching staff in Catholic elementary/middle and secondary schools is 161,496.

The FTE represents the total of all the full-time professional staff and the part-time professional staff with each staff member weighted as .33.

Per pupil ratios: The pupil/teacher ratio in Catholic schools in 2000-2001, determined by the FTE, was approximately 16:1 By level they are: elementary/middle schools: 18:1, secondary schools: 13:1.

Over the past decade, the lay faculty percentages increased from 85% to the current 93.5%. At present, 6.5% of the professional staff are religious and clergy. Exhibit 22 presents the FTE data by category and percentage.

Ethnic and religious background data regarding all of the professional staff was collected. Exhibit 24 details the numbers and percentages of the non-Catholic professional staff members and Exhibit 25 provides the ethnic breakdowns and percentages within each of the regions of the nation.

Special Services to Students

Extended Day Programs

The 2000-2001 data collection of Catholic elementary and middle schools revealed that of all schools reporting this information 4,623 had extended day programs involving before and/or after school activities. This represents 66.8% of elementary/middle schools.

EXHIBIT 26

Title 1 Services

NCEA data collection on the number of students receiving remedial instruction through Title I of the Improving America's Schools Act (IASA) are presented in Exhibit 27. The totals are lower than actual because several of the dioceses with large numbers of participating students have not supplied the data. A listing by region and state is found in Appendix G.

Total	**4,045**	**140,585**

Federal Nutrition Programs

The 2000-2001 data collection reveals that many schools participate in the federal nutrition programs that provide free or reduced price breakfast and/or lunch to students whose family income level meets established criteria. The number of students receiving such services is indicated in Exhibit 28. The totals are lower than actual because several of the dioceses with large numbers of participating students have not supplied the data. A listing by region and state is found in Appendix G.

Government Subsidized/Free Transportation to School

Many dioceses reported that students were provided free or subsidized transportation services to/from school by local or state governments. The number of students reported receiving such services is indicated in Exhibit 29. Not all dioceses have provided this information. A listing by region and state is found in Appendix G.

Schools with Internet Access/E-Rate Program

In this survey, dioceses were asked to report on the number of schools which provide students with access to the Internet. The number of schools that make this technology available to students is listed in Exhibit 30. Since 1998, schools were able to apply for discounted telecommunications services under a program known as the E-Rate. The number of schools that received E-Rate discounts in the last school year as well as those that applied in 2000 is included in Exhibit 30. Not all dioceses provided this information. A listing by region and state is found in Appendix G.
